Introduction

Seattle Local. I currently own a Real Estate Investments company called Path Investments Group. I have been pretty lucky in the past ten years. Top performer at all my corporate wholesale jobs and owned my first company at 23. No complaints :)

Why are you interested in Hackers & Founders Seattle?

I recently co-founded my own software company, called On The Go. We're funded, have a scalable plan, have had expensive contractors create our algorithm and have been fortunate enough to come across three rockstar advisors who are very good in the tech world. We need our own technological co-founder/CTO. I'm hoping to locate him/her and also network. I have very important meetings this month to show our demo, but after that, I'll need to get the working prototype into the market for my clients. Help! is an understatement !

What Drew Morrison is saying about this Meetup Group

really nice group of people.... great talent and everyone is friendly and helpful!
